Puji Harsanto (Muhammadiyah Yogyakarta University, Indonesia)
Nino Viartasiwi (Ritsumeikan University, Japan)

Aims and Scope

The International Journal of Sustainable Future for Human Security (J-Sustain) originated from the need to provide an interdisciplinary forum where the most serious problems affecting a sustainable future for human security can be discussed, in recognition of the fact that many future problems cannot be solved by a "siloed" approach. The emphasis on sustainable futures is in response to the general awareness of the need to solve numerous human-related problems resulting from the rapid growth of modern society.

The topic of sustainable futures for human security needs to be discussed in an integrated way, in accordance with the principles of sustainability, considering energy and materials supply, economies and trade, technology, cities, agriculture, social and environmental aspects.
